

GLEN E-SEL PLUS

Vitamin-E with Selenium, Zinc and Biotin

Glen E-Sel + is a dietary supplementation with Vitamin E, Selenium, Zinc and Biotin a unique powerful blend of antioxidants trace mineral & enzyme. Vitamin E, an antioxidant present in the cell membrane, prevents the formation of harmful free radicals. Selenium functions throughout the cell to destroy peroxides, another harmful compound. Zinc is an essential trace mineral boost immunity and aid in metabolism, digestion, nerve functions. Biotin is a coenzyme involved in the digestion of carbohydrates, synthesis of fatty acids, and gluconeogenesis.

BENEFITS:

- Reduced mortality and increased body weight gain of nonimmunized chickens infected with E. tenella in three of four experiments
- Improved the reproductive performance of breeder pullet
- Best performance in egg production, egg mass, feed efficiency, hatchability and fertility
- Promotes the phagocytic activity of macrophages, especially at thymus level and is involved in other immune mechanisms mediated by cells
- Boost immunity
- Foster metabolism & digestion functions
- Nurtures functions such as bone development, feather development

INDICATIONS:

- To reduce incidence of ascites and sudden death syndrome in broilers
- To reduce leg weakness syndrome in broiler
- Promotes growth and weight gain
- Helps immune system & metabolism function
- Ameliorated nervous system functioning

RECOMMENDED DOSAGE:

Broiler/ Breeders / Layers : 10 to 20 gm for 100 Birds through drinking water or 100-150 gm per kg of feed or as recommended by Veterinarian

PACK SIZE:

200 gm, 500 gm, 1kg

COMPOSITION:

Each Gram Contains

Vitamin E	100 mg
Sodium Selenite	20 ppm
Zinc	900 mcg
Biotin	200 mcg
